## Explore the innovation

### Why Spoter Stands Above The Competition

**Better Management** : Spoter helps a owner to track & manage, monitor, safe-guard, driver, goods and fleet through a single web interface.

- **Mapping** : We are partnered with well known mapping providers 'Google mapping' – for the most accurate and up-to-date mapping.
- **Real Time Tracking** : Undoubtedly, one of the most important advantage is real-time information that one receives about the location of the vehicle.
- **Better Maintenance** : Improve the regularity and timeliness of preventative maintenance with automatic GPS tracking on vehicles.

**WHAT IS GPS VEHICLE TRACKING SYSTEM?**

GPS Vehicle Tracking system is a system by which you can track/watch your vehicle [Bike / car / Bus / Truck] live location, live status, if still - how much time still there, if running- how much is the speed, total running km and approximate fuel consumption etc. from your internet connected mobile or pc. You can watch past data's also.

**HOW GPS VEHICLE TRACKING SYSTEM WORKS?**

1. A GPS Vehicle Tracking Device install in vehicle. It calculates position by satellite.
2. A GSM SIM Card have to be install in this device, and it should be filled with data balance , by which device send the data to main server.
3. By unique user id and password we can watch the vehicle by access server's website version or using mobile apps.
